PURPOSE: To provide sufficient financial resources to fund the operations of Student Health Services (SHS).

POLICY: SHS is an auxiliary service of the University of Kansas. Consequently, all sources of revenue must be self-generated. The sources of revenue are:

1. **Student Health Fee.**
   - All students taking six or more credit hours during the spring and/or fall semester are required to pay the health fee. Students taking less than seven hours will pay a pro-rated amount.
   - All students taking four or more credit hours during summer school are required to pay the health fee. Students taking less than four hours will pay a pro-rated amount.
   - In the event a student who has paid the pro-rated amount seeks services at WMHC, he/she will be required to pay the balance of the health fee. An exception to this policy is granted to students who are simultaneously enrolled on both the Lawrence Campus and KUMC and have, subsequently, paid a portion of the health fee on both campuses.

2. **Fee for Service**
   Fees are charged for dietician services, selected general medicine services, gynecological services, selected Wellness Resource Center services, laboratory tests, pharmaceutical, physical therapy, radiology, selected urgent care services, copies of medical records, medical supplies and devices.

   The amount of these charges is determined by Administration based upon the cost of the resources and the charges for comparable services in the Lawrence community. The charges should be less than the community standard yet sufficient to cover SHS costs. The fee-for-service charges for students who have paid the health fee are less than for those visitors and guests.

3. **Endowments**
   SHS is occasionally the benefactor of donations and/or bequests. These funds are administered and monitored by the University’s Endowment Association.
4. **Research/Grants**  
SHS will seek out funding opportunities offered by outside organizations. All funding associated with these programs will be administered and monitored by the University’s Office of Institutional Research and Planning.
